VICTOR MILL STARCH—THE WEAVER'S FRIEND

THE HOME OF VICTOR MILL STARCH

Why worry about **POTATO STARCH** when **VICTOR MILL STARCH** will give as good results as Potato Starch on warps of any numbers, from 6s to 100s.

It boils thin—penetrates the warps—increases breaking strength and carries the weight into the cloth. Being thoroughly washed free of gluten and other foreign matter, it gives a bleach and finish to the cloth that you can get from no other starch.

A trial order will convince you that **VICTOR STARCH** has no equal in the market.

CHARLOTTE, N. C., THURSDAY, NOVEMBER 22, 1917

NUMBER 12

ADVANCE NOTICES OF EXHIBITS

Continued from last week.

Puro Sanitary Drinking Fountain Company.

The Puro Sanitary Drinking Fountain Company, of Haydenville, Mass., will show not only their regular Puro Combination Drinking Fountain and Faucet and Puro Junior but also the Sherman Bubbler which is especially adapted for school purposes. Besides this, they expect to exhibit a combination of ice cooling tank in conjunction with our sanitary fountains which we believe will fill a long felt want throughout the South. This has only just been put out after very careful experimenting and thorough investigation of the problem. They have combined not only the sanitary feature which is well-known throughout the South but have also fitted it so that a continuous stream of cool water can be obtained from these tanks at a nominal expense. The tank will hold about 100 pounds of ice. It contains two lengths of coil pipe. It is fitted with an air-tight iron cover with a rubber washer underneath and a clamp so made that this tank can be locked and air-tight conditions prevail inside of this tank.

Besides all the foregoing, they have perfected a combination which is according to the majority of sanitary experts in the United States and Canada the most scientific sanitary fountain which has ever been produced by any manufacturers. This will take away all objections to drinking fountains which have been placed on the market up to the present time.

G. A. Cooper, sales manager, will be in charge of the exhibit throughout the week and will be very pleased to meet and discuss drinking problems with any of the factory owners, managers, or superintendents.

U. S. Gutta Percha Paint Co.

The U. S. Gutta Percha Paint Co. will have an exhibit at the Southern Textile Exhibition, and it will contain a large hand painted picture, representing the lifting of a roof from a factory, showing the interior painted with Barreled Sunlight, also a churn equipped barrel of the kind used in shipping their paint, this too being painted with Barreled Sunlight. Besides this they will have pictures of mills which have been painted with their paint, and Barreled Sunlight trademarks and souvenirs.

John S. Palmer will be in charge of the exhibit.

L. Sonneborn Sons.

L. Sonneborn Sons, Inc., of New York, will exhibit finishings, softeners, brighteners, and sizing products for the manufacturing process; Lapidolith, a concrete hardener; Cemcoat, for walls; Stormtight, for roofs, and technical paints for the maintenance of buildings and all kinds of lubricating oils and greases for the maintenance of machinery.

The following named gentlemen will be present at the exhibit, namely: J. C. Haas, sales manager, textile department; C. J. Medwedeff, representative; S. G. Slavin, assistant sales manager, textile department.

Steel Heddle Mfg. Co.

The exhibit of the Steel Heddle Mfg. Co., at Greenville, will consist of an exhibition of heddles, frames, and drop wires, and they will have a number of loom concerns such as the Crompton & Knowles Loom Works and Stafford Company, exhibiting their harnesses in the looms, so as to give a practical demonstration of steel heddles.

Their Southern representative, Hampton Smith, will be in charge of the exhibition and Robt J. Friefag hopes to pay a visit.

Cling-Surface Company.

The Cling-Surface Company will demonstrate the preservative effect and efficiency of Cling-Surface Preservative Treatment for transmission belts and ropes by means of an operating exhibit showing belt driven pump, belts being both treated and untreated, with dials and gauges showing the relative output and efficiency of belts so treated as compared with those which have not had such treatment.

J. B. Faatz will have charge of their exhibit.

National Scale Co.

The National Scale Co. expect to exhibit the following: National counting machines, National-Chapman elevating trucks, National combination scale-truck, National calling system, multi-unit sectional steel shelving.

The exhibit will be in charge of J. W. Grayson, sales manager.

Hunter Mfg. & Commission Co.

The Hunter Mfg. & Commission Co., of 58 Worth street, New York city, will exhibit at Hunter's Country Store, a large and diversified selection of finished and converted

fabrics that you must not fail to see while visiting the Southern Textile Exposition.

An art booklet that will be distributed will contain photographs of the plants represented by the Hunter Company, and also descriptions of the fabrics sold by them. This booklet will reflect in an attractive way, the claim of this firm as international distributors of cotton fabrics.

All visitors will be welcomed to this booth, and each will receive a souvenir. Especially are the ladies invited to register at Hunter's Country Store and receive a coupon entitling them to participate in the drawing for a Victrola, which will be given on Saturday evening to the lady holding the lucky coupon.

The exhibit will be in charge of Robert F. Bowe and Samuel Gibson, both of their New York office.

Fibre Specialty Mfg. Co.

The exhibit of the Fibre Specialty Mfg. Co. will consist of roving cans, warehouse cars, doffing boxes, doffing cars and a complete line of fibre hollow wares as used by the textile industries.

The exhibit will be in charge of their Southern office, 308 Masonic Temple, Greenville, S. C. G. B. Scarlett, general manager of the concern, will also be in attendance.

N. Y. & N. J. Lubricant Co.

The New York & New Jersey Lubricant Co. will have on display grades of non-fluid oil that have been developed especially for the textile industry, and that are designed for lubricating every machine employed in the carding, spinning, twisting and weaving of cotton. They claim that these lubricants possess the marked advantage over all others of insuring freedom from oil stains on goods in process, thereby stopping a loss which costs Southern mills many hundreds of thousands of dollars each year.

Besides men from their regular sales staff, the company will have in attendance men who have specialized on the lubrication of textile machinery, so are amply qualified to give mill superintendents and engineers expert advice on this subject and recommend for each machine lubricants that will insure its working at the lowest operating expense.

At the Exposition, the New York & New Jersey Lubricant Co. will distribute, gratis, a text book on textile machinery lubrication, in which is

illustrated every machine through which cotton passes from the bale to the packing room and which treats of the lubricating difficulties usually experienced and the remedies for them.

The following of their representatives will attend the Exposition: W. F. Kimball, president; Jos. H. Ben-nis, vice-president and sales manager; Lewis W. Thomason, Southern agent; J. W. Slater and B. M. Lattimore.

Southern Textile Machinery Co.

The exhibit of the Southern Textile Machinery Co. will consist principally of motors. They are selling agents for Robbins & Myers Company and will have on exhibition a line of their motors, generators, etc. J. McL. Jones will have charge of the exhibit and the officers of the company will also be present.

Franklin Process Co.

The Franklin Process Co. intends to exhibit their regular Franklin yarn dyeing machinery, Franklin machine for dyeing hosiery, Franklin top dyeing machine, Franklin jack spool dyeing machine together with samples to show the results obtained with these machines.

G. C. Urquhart and Michael A. Sheehan will be in attendance; also their Mr. Taylor.

Barber-Colman Company's Exhibit.

This exhibit will be in spaces 250 and 251, on the second floor. It will be in charge of Field Manager R. E. McCausland of Rockford, Ill., and J. H. Spencer and N. H. Alford of Greenville office.

The model of machine shown will be the Portable type, which is being so largely used by manufacturers of towels, damask, heavy duck, and tire fabric. A striped warp, which was tied in at a mill, will show prospective purchasers the practicability of using the Barber Warp Tying Machine on a great variety of patterns. All sizes of the Barber Knot-ter will also be shown.

U. S. Ring Traveler Co.

The U. S. Ring Traveler Co. will show a variety of ring travelers. Matt Ousley will be in charge.

National Starch Co.

The exhibit of the National Starch Co. will consist of a full line of their industrial products. They will also exhibit products made by other concerns in which their products are used. They will show their Eagle Finishing starch which is

(Continued on Page 6.)

THE DYESTUFF SITUATION

L. F. Stone, New York, Before National Association of Cotton Manufacturers.

In speaking on this subject, I wish to say in the beginning that there has been so much published in this connection during the past three years that it would be very difficult to add anything new to what has already been published, and not only that, but most of you gentlemen present, who are connected with the cotton industries and are buyers of dyestuffs, are logically very well posted on the situation through your experience in buying since the war; in other words, you already know about what is in the market and about what you can get, and know practically all about the situation.

Taking this to be true then, it is evident that you all know that at the present time there is an ample supply of all of the necessary dyestuffs which are needed for consumption in this country, and that on many of them there is an oversupply, due to the fact that there has been a great development in the dyestuff manufacturing industry, and on some colors therefore there is now more produced than is actually consumed, so that the dyestuff situation, as a situation, is no longer a serious one. While the necessity for this development in this country is apparent through the failure to obtain supplies from European countries, principally Germany, it is not so apparent to the layman how the American manufacturers have been able to develop the products so generally, and this in so comparatively short a time, as they have actually done in about three years what it has taken European manufacturers almost forty years to accomplish.

Imported Intermediates.

It must be remembered that before the war there were only comparatively few manufacturers engaged in the manufacture of coal-tar dyestuffs, and none of those were of any great importance compared to the European factories. One reason among many why the American manufacturers were not successful in obtaining before the war what they attained since the war was the lack of raw materials in this country, it being a fact that before the war they had to depend entirely upon European sources of supply for their raw materials; and these raw materials, by the way, came over here mostly in the shape of half-finished products, called intermediates, so that all that they did was to finish these half-finished products and did not manufacture colors directly from the crude raw materials like benzol and naphthalene. It is, therefore, evident that when they had to buy their raw materials from Europe they could not very well compete with the European manufacturers in the finished colors. This lack of raw material, however, was not due to the lack of natural resources of the United States, but simply to the fact that these natural resources had not been developed, as while, for instance, benzol, naphthalene and sim-

ilar products which are the derivatives of coal, were produced to some extent in this country, they had not been developed to a degree that they were economically serviceable to American manufacturers; in fact, they were largely imported into this country from European countries where they had been highly developed.

Recover Intermediates Here.

Immediately after the war, however, there came a strong demand for benzol and toluol, particularly for the manufacture of explosives, and as a consequence the oven owners, steel manufacturers and other industries who used large quantities of coal and coke, immediately began to recover these derivatives from the coal-tar, being able to do so at a profit, owing to the abnormal prices at once occurring after the war started. The development of these products has been so large that there is now produced in this country an enormous quantity of these products, enough, in fact, to take care of all of the manufacturers of explosives, as well as the manufacturers of dyestuffs which are made from the same products. With this immense development of raw material came the possibility of a correspondingly large development of manufactured colors, and never again will it be necessary for American manufacturers of coal-tar

products to look to European sources for their supplies.

American Quality High.

With the development of the color manufacture in this country came at once the question of the quality of the products, and it was a popular impression for a long time that the American products were not as good as those manufactured in Europe, but this belief is now being rapidly dispelled, as it has been proven that the colors used by consumers which are made in America are fully as good as the same colors made in Europe, in fact, they are exactly the same chemically, and therefore cannot be any different in their quality or application. This is only true, however, where they are manufactured by reliable and experienced manufacturers of which there are now quite a considerable number in this country, although it is true that many of the products manufactured by the smaller and more inexperienced manufacturers are not what they should be. Consumers, then, who will be careful to buy from reliable and well-known factories, will secure a quality of color which is fully satisfactory in every way.

The belief that the American colors were not as good as European, however, was largely with the masses of people, and not so much with the actual consumers of col-

ors, like the textile mills; but even this popular impression is being overcome, as only the other day I had the pleasure of talking with a large manufacturer of package dyes which go out throughout the country for household use, and who had sent out letters saying that they were now using American colors for their dyes, and I was pleased to have him inform me that he had received many letters from people who had used their package dyes, saying that they found the quality now perfectly satisfactory and as good as they ever obtained when these package dyes were put up from foreign colors. These remarks apply to the fastness of the colors as well as to the strength and shade, as it is a fact that the American colors are fully as fast as the same colors made in Europe. Although it is true, of course, that some of the fast colors, particularly for cotton, like vat dyes, have not yet been produced successfully in this country, it is also true that sulphur colors which are extraordinarily fast for the same purpose, are produced here largely. The cotton manufacturers, therefore, particularly those who manufacture ginghams, shirtings, denims, etc., are now particularly interested in knowing when they can expect American products which they need for these fast col-

The ENDURANCE of the OAK

Endurance that defies the assaults of years! Strength that grips the pulleys as the spreading roots of the oak tree hold to the ground through every storm! The toughness of fiber that bends to its load without breaking and without stretching or losing its shape! The symbol of power that makes no compromise with stress and strain! You get all this when you install

BRADFORD'S Extra Heavy Single Spinning Belt

Every strip is cut from the center stock of selected hides of steers in the prime of their strength,—tough, resilient, healthy. No strip is more than 46 inches long measured from the tail. No shoulder stock, no belly stock, no shims! All uniform, prime leather, tanned and curried and stretched for the sole purpose of delivering power without loss.

The laps are cemented together with "MONARCH" Leather Belt Cement, the most tenacious, *stick-to-it-ive* cement ever produced for belting purposes. And our guarantee is as binding as our cement.

Make us prove our claims.

THE BRADFORD BELTING COMPANY

200 Walnut Street

Cincinnati, Ohio

M. C. SANDERS, Manager Southern Branch and Warehouse, Greenville, S. C.

ADVANCE NOTICES

Continued from page 3

made in a wide range of fluidities and so extensively used for warp sizing and finishing by the mills through the entire textile industry. Their exhibit will include our recent developments in the manufacture of gums and dextrines which are of special interest to the textile industry at the present time.

The exhibit will be looked after by Mr. White and Mr. Smith of the Greenville office and Dr. W. R. Cathcart, technical director, will also be present and will gladly furnish any information of a scientific or technical nature in connection with their products.

Certain-teed Products Corporation.

The exhibit of the Certain-teed Products Corporation will consist of a complete line of Certain-teed roofing material, and a complete line of Certain-teed paints and varnishes.

They will be represented by Brent A. Lattimer of their Richmond, Va., sales-office, and G. M. Williams of their Atlanta office.

Stein, Hirsh & Co.

Stein, Hirsh & Co. will show starch and all kinds of starch products and will be represented by William A. Boyd and Lewis W. Peabody. They will occupy sections 325 and 326.

Veeder Mfg. Co.

The Veeder Mfg. Co. will show a very complete line of counters for looms, etc. Their exhibit will be in charge of W. C. Waldo.

Papco Paper Products Co.

The Papco Paper Products Co. of Atlanta will have on exhibition their Papco brand slasher tape moistening machine, and all widths of our special gummed paper brand slasher tape.

F. B. Ludwig will be in charge of the exhibit.

Curtis & Marble Machine Co.

Curtis & Marble will have an interesting display of photographs, drawings and other data of their line of cloth room machinery, including brushing machines, shearing machines, inspecting machines, sewing machines, folding machines, rolling and measuring machines, etc.

E. H. Marble will have general charge of the exhibit, assisted by some of their other representatives.

The G. M. Parks Co.

The exhibit of the G. M. Parks Co. will consist of typical construction showing the Turbo Humidifier in operation, also the Psychrostat for automatically controlling the humidity. For the first time will also be shown the Niagara House Humidifier, which is nothing more nor less than a self-contained air washer in a small capacity unit. This Niagara humidifier will no doubt prove valuable in houses, offices, cotton sampling rooms and other small spaces which are to be cheaply humidified.

J. S. Cothran and B. S. Cottrell will be in attendance at the Exposition.

Swan & Finch Co.

Swan & Finch of New York will have one or more mechanical exhibits together with samples of their products, signs and descriptive booklets of an engineering character.

They will probably have about six men, Richard Thackray, sales manager; Philip S. Dodd, L. A. Block, R. A. McLay, Wm. Sharp.

Ware Shoals Mfg. Co.

Ware Shoals Mfg. Co. expect to have the following exhibited: Samples of sheeting, shirting, drills and Osnaburgs. Also bags made from cloth of their manufacture, a collection of pictures showing views of Ware Shoals, and also activities of their welfare department.

Miss Mamie Burns of Ware Shoals will have charge of our exhibit.

Metals Disintegrating Co.

The exhibit of the Metals Disintegrating Co. will consist of samples of their various products, such as high grade zinc dust, suitable for dye and textile industries, aluminum dust, tin dust, lead dust and aluminum paint. All of these products are made by a special process and are of the highest grade.

S. G. Schatzberg will be in charge of their exhibit.

Oxweld Acetylene Co.

Oxweld Acetylene Co. will have a complete Oxweld welding and cutting portable outfit in actual operation in their booths at the Southern Textile Exposition. In addition, they will have on display, but non-operative a 50-lb. carbide capacity Oxweld low pressure acetylene generator.

Special signs will be used to draw the public's attention to the fact that both the welding and cutting torches are of injector type, and claimed by them to be the most economical and most mechanically perfect oxy-acetylene torch yet devised; that the entire equipment, including generators, torches, regulators, etc., are approved by the National Board of Fire Underwriters' Laboratories, for installation on insured premises; that a soft weld on cast iron is a surety when Oxweld blowpipes are used.

L. E. Ogden will personally have charge of our exhibit at the convention; and the following representatives will be present: J. D. Beckett, Southern sales representative; F. R. Chadwick, Virginia sales representative; P. J. King, junior Southern sales representative, and C. A. Bradburn, sales service man, will be in charge of actual operative exhibit.

Westinghouse Electric Company

One of the most important factors in the textile industry is the application of electricity as a form of motive power. With this thought in view the Westinghouse Electric & Mfg. Co. which has been a pioneer in the development of electrical apparatus for application to the textile industry, has prepared an attractive exhibit for the textile show.

There will be shown several electric motors specially designed for driving textile machines of various kinds. Included with the motors will be what is equally important—the control devices consisting of a starting switch for certain types of application and auto starters.

One of the particularly interesting features of the exhibit will be an induction regulator for maintaining a constant voltage which is very essential to the successful operation of textile machinery. This regulator

Box 31

CROMPTON, R. I.

Output of India's Cotton Mills.

Figures compiled by the Indian Department of Statistics from accounts rendered by mill owners and covering the output of cotton spinning and weaving mills in British India and the Native States for the three months, April-June, 1917, show an increase of 0.24 per cent in the amount of yarn spun as compared with the corresponding month of 1916 (this in contrast to a decline of 4.6 per cent in April-June, 1916, as compared with 1915); and a gain of 8.2 per cent in the quantity of woven goods produced (against an increase of 15.6 per cent in April-June, 1916, as compared with 1915).

The total quantity of woven goods produced in Indian mills during April-June, 1913, 1914, 1915, 1916, and 1917 was 66,479,790 pounds, 69,601,854 pounds, 82,080,492 pounds, 94,868,121 pounds, and 102,660,107 pounds, respectively. Figured on a conventional basis, this output represented 289,936,213 yards of gray, bleached, and colored piece goods in 1913, 296,153,300 yards in 1914, 343,361,415 yards in 1915, 394,485,053 yards in 1916, and 429,504,922 yards in 1917; and included, besides, 175,246 dozen hosiery and gray and colored woven goods other than piece goods in 1913, 178,096 dozen in 1914, 130,434 dozen in 1915, 189,383 dozen in 1916, and 265,582 dozen in 1917.—Commerce Reports.

Trade to Reduce Size of Samples.

A substantial saving in the quantity of cloth that is used for samples by tailors to the trade in the United States is assured by an agreement which has been made as a result of conferences with the Commercial Economy Board of the Council of National Defense. A maximum of 6 by 9 inches has been fixed for such samples, and it is estimated that the reduction represents enough wool to uniform more than 67,000 soldiers. Mr. A. W. Shaw, chairman of the Commercial Economy Board, in a letter to Secretary of Commerce Redfield, states:

"My Dear Mr. Redfield: We have just found out the results of one of the minor phases of our wool campaign, and I know you will be interested in them, because the saving, while comparatively small, is so clean and definitely measurable.

"In the course of our conferences last summer we asked the tailors to the trade—those concerns that send out swatches of samples to retailers and make suits to order for the retailers' customers—to reduce the size of these samples. The National Wholesale Tailors' Association, representing about two-thirds of the tailors to the trade, unanimously agreed to do this. Mr. William Cahn, president of the association, and certain other members undertook to secure the co-operation of the remaining one-third. Mr. Cahn now reports that the entire industry with the exception of three firms is pledged to send out no samples larger than 6 by 9 inches. This means samples averaging 21 1-2 per cent smaller than last year. The cloth used for these samples last year totaled 1,037,000 yards. The

saving therefore is 223,108 yards, at current prices, \$419,500, and representing enough will to uniform 67,600 soldiers.

Mill Gardens Produce \$11,000.

Lexington.—The Erlanger Mill village steps to the front with a gardening record that beats the United States according to all available statistics for the year 1917. Under the supervision of Miss Linda Clement, a United States department of agriculture expert, this village entered the mill garden contest conducted under the eye of Dr. P. P. Claxton, of the United States bureau of education. The records have been counted up at Erlanger and the net results was a saving of eight thousand dollars in garden truck used on the table.

In addition to this the people of the village have canned 14,468 quarts of vegetables, practically all from these gardens, and in addition 2,103 containers of jelly and 384 quarts of preserves. The value of the canned stuff, at very conservative estimate in view of present prices, is three thousand dollars. Thus have these mill toilers produced on a worn-out soil, in small back yard gardens, eleven thousand dollars worth of products in one year.

The final garden round-up was held in the nature of an entertainment at the village Y. M. C. A., probably the best in a village of the size in the nation. Prizes for gardens, flower and vegetable, were awarded to the extent of \$175.

One hundred and eighty gardens were enrolled in the contest against fifteen last year. J. W. Smith established himself as champion, with products worth \$102.80 grown in a small back lot. Mrs. Burt was second with \$86, and Mr. Freeman with \$78.89 was third. The average yield of gardens was \$45. After the prizes were awarded, a ten dollar gold piece was presented to Miss Clement by the gardeners as a token of appreciation of her work in assisting them to such a splendid victory over high living costs. In addition to her gardening work, Miss Clement has conducted a greenhouse at Erlanger, which is doing its full share in beautifying the homes with flowers.

So far as can be learned here, the nearest approach to the Erlanger record was made by two combined mill villages in Concord, which report 12,000 cans of vegetables, with no estimate on the amount of truck used from the gardens on the table.

Golf Tournament at Exposition.

In connection with their exhibit at the Southern Textile Exposition at Greenville, South Carolina, during the week of December 10th, the Hunter Manufacturing & Commission Company, through the courtesy of the Sans Souci Country Club have arranged for a golf tournament to be played at the Country Club on Thursday, December 13th. The prizes and entertainment will be furnished by the Hunter Mfg. & Commission Co.

DISCUSSIONS BY PRACTICAL MEN

Child Labor Law.

The following interpretations of rulings on the Federal Child Labor Law are published by the Arkwright Club in their current bulletin, and were made by Julia C. Lathrop, head of the Children's Bureau of the Department of Labor.

In answer to an inquiry as to whether it is necessary for a manufacturer to secure guaranties for all the materials used in the manufacture of a finished product in order to enable him to guarantee his product, it is stated:

"It is believed that whenever any industry mentioned in the United States Child Labor Act completes the work which it does on an article, that article may be said to be the product of that industry or establishment. A manufacturer or producer, who gives a guaranty following the form laid down in Regulation 12, for goods or articles manufactured or produced by him, covers with his guaranty only the conditions in his own establishment."

Upon being asked as to whether such a manufacturer, in the event that he should sell the product of another factory with the products of his own factory, needs to secure a guaranty to be protected against prosecution, she states:

"In the opinion of this Bureau the manufacturer or producer under those circumstances becomes a dealer, and if he transports, ships or delivers for shipment from the state of manufacture or production the products of other factories he needs a guaranty."

"In your letter you ask whether a rubber stamp signature of the manufacturer or producer to the guaranty is a sufficient compliance with Regulation 12 of the Rules and Regulations for carrying out the provisions of the Federal Child Labor Law. In the opinion of this Bureau, this regulation does not make a manuscript signature necessary. A rubber stamp or printed signature is sufficient if such a signature is adopted by the person, company or corporation issuing the guaranty."

"In your letter of recent date you ask whether bleacheries or dye works in which gray goods are dyed, printed, mercerized, bleached, or otherwise treated for the market, come within the provisions of the United States Child Labor Act. In the opinion of this Bureau such bleacheries or dye works are factories or manufacturing establishments within the meaning of the United States Child Labor Act and the standards laid down in Section 1 of the act must be observed in these bleacheries or dyehouses to make the shipment of the products of such bleacheries or dyehouses interstate or foreign commerce legal."

Kind of Letter We Appreciate.

Mr. David Clark, Editor,
Southern Textile Bulletin,
Charlotte, N. C.
Nov. 16th, 1917.

Dear Sir:

I have advised the _____ Co., of _____ to place their advertising with you, in the Bulletin. They have asked that I request you to get in touch with them, with this end in view. I assured them that they would hear from you within the next few days.

Very truly yours,

Supt.

This letter came last week from a prominent superintendent and actions of this kind are always appreciated. The Southern Textile Bulletin never forgets its friends and the man who does us a favor of this kind always gets our help if he ever comes to need it.

Silk and Cotton Thread in New Zealand.

Stocks of cotton and silk thread in New Zealand are below normal, notwithstanding the increased value of imports.

Heretofore British manufacturers have supplied most of the cotton thread, while the American manufacturers seem to take the lead in silk thread; but British houses are not accepting new orders for delivery during the war, and stocks of cotton thread are below normal.

Both silk and cotton threads enter free of duty from all countries, except for a 1 per cent war tax.

Practically all of this business is done through the general importers of dry goods, whose addresses are forwarded (this list may be obtained upon application from the Bureau of Foreign and Domestic Commerce or its district and co-operative offices by referring to file No. 93608), to whom it would be well to send samples, price list, etc.—Commerce Reports.

China and Japan have signed an agreement to lease the Kirin-Chang Chun railroad, Manchuria. Japan will loan China \$3,250,000 at 5 per cent for thirty years, holding the earnings of the road as security. The South Manchuria Railway Company will manage the line.

"The happiness of duty lies in the knowledge that we have done our best to carry out to the best of our ability that with which we are entrusted."

Use Efficient Drives

NOW, if never before, efficient methods must take preference over time-worn methods. Today is the day when results count. Even the best is none too good.

Dyestuff Situation.

(Continued from page 4.)

ors on these materials. I am glad to say that as a starter, indigo is now being manufactured in this country to a certain extent, and will be manufactured largely next year, so there will be an ample supply of this important color for all purposes, it being a fact that several large manufacturers, one of them being my own company, are now taking contracts for indigo for 1918 delivery, and will be able to produce all that is needed for consumption.

New Colors to Be Made.

Another color which will be produced very shortly by my own company will be hydron blue, which as you all know is a very important fast color for cotton goods, and following this indigo and hydron blue will surely come in succession other shades of like colors, as we are already arranging to have the raw material produced for the purpose.

The situation now, then, is that with a practically full line of direct sulphur, chrome azo or acid colors, as well as vegetable dyes like indigo, logwood, etc., with an immediate probability of indigo and vat dyes, the country will be well supplied with everything that it needs and will no longer have to look to European sources of supply. This does not mean, of course, that every color will be manufactured here immediately, as there are still some specialties in all colors which have not yet been made, but they are comparatively small in consumption and are not of real importance, although even at that some of them

will be taken up in due course, there being no reason why every color which is wanted cannot be made here.

Now, admitting that the color and coal-tar dyestuff industry is in very satisfactory condition as I have mentioned, comes a question whether or not it will be a permanent industry, or whether or not the European manufacturers will again secure a partial monopoly of the business which they had before the war, and to this question I must say that I have no doubt whatever that the industry is a permanent one for the following reasons:

1. The production of coal-tar derivatives like benzol, toluol, naphthalene, etc., has, as I have said before, been increased to such an extent that the quantities produced are now fully equal to the needs and can be produced at as low a price in this country as they can be produced in Europe. Therefore, American manufacturers will always have the advantage of American produced raw materials, as it is well known that the United States has practically inexhaustible supplies of coal, which is the base products necessary.

2. The United States Government has finally discovered that in order to make the industry permanent it is necessary to give a more adequate tariff protection, and therefore the present tariff bill has given some extra protection and the Anti-Dumping clause, both of which will be very valuable in retaining the industry. Should the present laws not accomplish this, then I have no

doubt that the Government will give up further legislation to accomplish the end.

3. Manufacturers of intermediates and colors have, during the war, been able to obtain, through abnormal conditions, a profit which has enabled them to largely pay for their extensive plants, as well as to accumulate a surplus which they can use if necessary in competition and increase their present production, and the working out of colors now not manufactured here.

4. The American consumers have realized, due to the conditions prevailing since the war, the importance and necessity of having a coal-tar industry in this country which will in future prevent any repetition of the conditions which prevailed just after the beginning of the war, when it was found somewhat impossible to secure enough colors for the consumption of the country, as a consequence of which many consumers were obliged either to run their mills or factories only a part of the time or, as in some cases, close down entirely. With this realization, therefore, they will undoubtedly give the preference to American products, which in itself would help any competition against European manufacturers after the war.

5. The question of price will naturally adjust itself to conditions after the present abnormal conditions are over; that is, when raw materials which are now used largely for explosives, and consequently demand high prices, being used for war purposes, are available for com-

mercial purposes, prices will be reduced, and it follows that the manufactured colors and other products made from them will also be reduced.

To sum up briefly the whole question of the permanency of the American dyestuff industry, it is apparent from the above that with factories capable of producing the colors necessary for competition, with adequate tariff protection by the Government and strong financial conditions established during the war, and the preference of American consumers for American products, we have certainly insured the permanency of the American dyestuff industry.

No peace can last, or ought to last, which does not recognize and accept the principle that governments derive all their just powers from the consent of the governed, and that no right anywhere exists to hand people about from sovereignty to sovereignty as if they were property.—Woodrow Wilson.

Think out new ways; think out new methods; think out even new ways of dealing with old problems. Don't always be thinking of getting back to where you were before the war. Get a really new world.—Lloyd George.

The best way to shorten the war is to prepare fully to go on with it, and the best way to prevent future wars is to make ready now. I am for universal military training.—Elihu Root.

Save Coal--One Out of Five Cars!

COTTON WEAVING AND SPINNING MILL

Save coal—one out of five cars!

If you have the ordinary steam lines you can secure this saving by installing the Morehead "Back-to-Boiler" System. Big North Carolina Textile Mills have found it to be what we claim.

"Have two complete systems in continuous operation. Realizing a good saving," says L. Banks Holt Mfg. Co., of Graham, N. C.

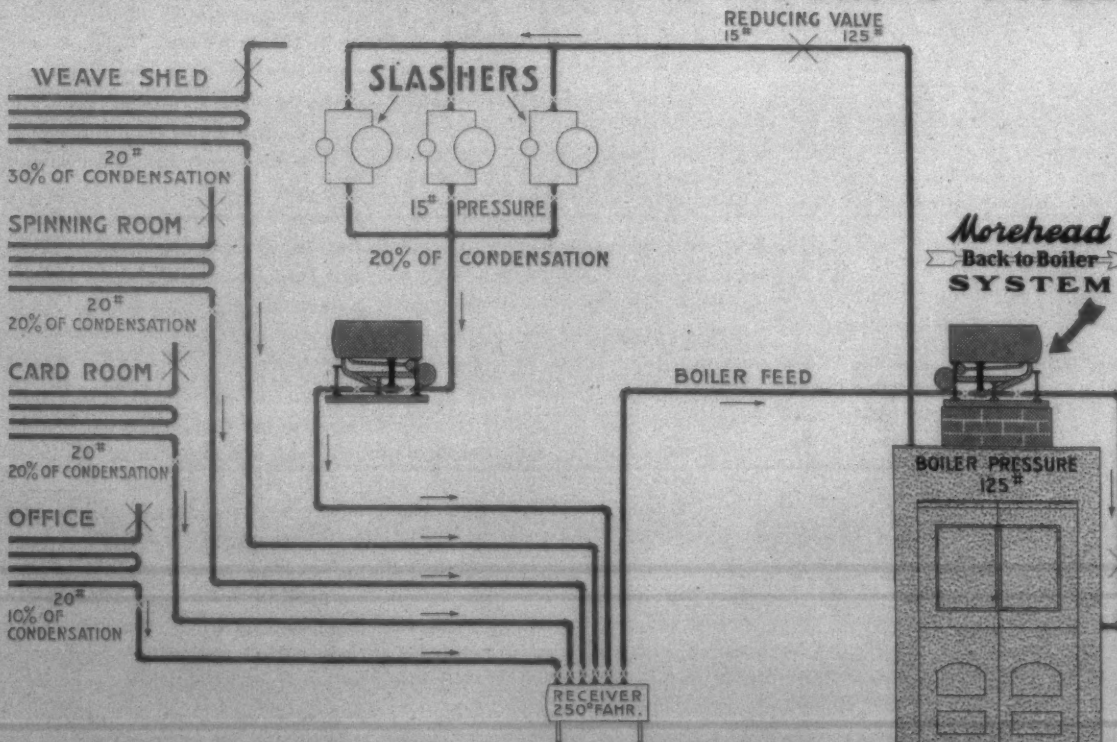

"Good results on both high and low pressure lines with a considerable saving," says Elmira Cotton Mills Company, of Burlington, N. C.

"Well pleased, consider it a profitable investment," says Wysong & Miles Company of Greensboro, N. C.

"Using one of your systems for four years. Glad we put it in," says Sheppard Veneer Co., of Winston-Salem, N. C.

Other big users are equally well pleased. Ask us for more information. You will certainly want the Morehead "Back-to-Boiler" System when you are familiar with what it will do.

MOREHEAD MFG. COMPANY,
Detroit, Michigan.

THURSDAY, NOVEMBER 22, 1917

"Health and Happiness Number."

By working night and day we hope to be able to issue our "Health and Happiness Number" on December 6th.

It will be by far the largest thing of its kind that has ever been issued in the textile industry of this country.

It will be printed upon enamel paper and will be filled with beautiful cuts of cotton mills, cotton mill people, churches, schools, welfare houses, etc.

The first pages will contain statistics and proof relative to health and living conditions in Southern mills and will be followed by illustrated write-ups of conditions and surroundings in individual mills.

More than one hundred mills have already taken space varying from one-half page to two pages. Every superintendent should urge upon his president to take space because no such edition as this "Health and Happiness Number" has ever been issued, or is likely to be issued again for many years.

The object in issuing this number is to send it to Federation of Women's Clubs throughout the United States with the object of giving them a different idea of cotton mill conditions in the South.

The Child Labor Committee have educated these women's clubs to believe that living and working conditions in our mills are horrible and they therefore put pressure behind

any legislation that is sought by the agitators.

We can not get these women to come and see our mills, so we are going to carry the mills to them through this beautifully printed and illustrated "Health and Happiness Number."

If the Southern mills had been wise enough to put such information in the hands of the women of the North and West ten years ago we would probably not have had any Keating Law.

Every mill which has taken space in our "Health and Happiness Number" has made a good investment for the future.

The "Health and Happiness Number" will be exceedingly expensive to publish and we will be obliged to charge 25 cents for single copies.

Those who want extra copies of this number either to keep or to send to friends should send in their orders now.

One copy will be sent to each of our regular subscribers and one copy to each mill that has taken space.

We would like to see mill men send this edition to those of their friends in the North who have a mistaken idea of conditions in our mills, but such copies should be ordered in advance.

If you want copies of this "Health and Happiness Number" do not wait until it is published, for there may not be any copies for sale when you send in your order.

Wonder Who Is Paying Him Now.

Our readers are aware of the fact that for a long time we have had no admiration for Owen Lovejoy, secretary of the National Child Labor Committee.

Our lack of regard for Mr. Lovejoy has not been due to the fact that he was secretary of the Child Labor Committee but to his methods and to the fact that he apparently had a very slight regard for the truth.

We have long had a desire to know who was paying Lovejoy and McKelway, but we have an idea who is paying the former now.

In a recent issue of "Life" under the title "Found Out," we read the following:

"Amos Pinchot, Oswald G. Villard, Owen Lovejoy, Crystal and Max Eastman and Emily Balch were among the signers of a telegram to Professor Beard congratulating him on following Professor Cattell out of Columbia. Amos and the others represented the American Union Against Militarism.

"In the present state of the nation, anyone who finds himself felicitated by Amos and the Eastmans on any public action ought to begin to suspect what is the matter with him. When the crowd that these brethren and sisters run with approves, it amounts to a diagnosis."

According to our information Professor Cattell of Columbia University was so strongly pro-German that it became necessary for the trustees to call for his resignation and Professor Beard resigned because they fired Professor Cattell.

Owen Lovejoy was one of those who congratulated Professor Beard upon resigning and "Life" expresses very tersely its opinions and suspicions relative to him and his crowd.

At a time when the United States is in a death struggle with Germany and our men in the trenches in France are daily giving their lives for their country, Owen Lovejoy and "the crowd he runs with" are congratulating Professor Cattell and Professor Beard for unpatriotic utterances.

Since the war began it has become more difficult for Lovejoy and his rich old ladies of good money for "child labor campaigns" and we have been wondering who would pay him now.

The man who is not loyal to his country in a time such as this and tribe to milk the philanthropists and feels called upon to send messages of congratulation to other men for unpatriotic actions ought to be locked up in a detention camp.

We are not surprised to find Lovejoy with the Eastman crowd but are surprised that he was found out, for he is usually too smooth.

The Value of Export Trade in Textiles.

War is helping to a new understanding of the value of export trade in textiles. The merchants who have contended for years that the United States markets were broad enough for United States manufacturers are not as numerous as they were. The opportunity to enter foreign markets under conditions which permit American-made goods to receive favorable consideration is not being lost by some far-seeing men in the New York and Boston trade, and by a few men in Philadelphia. It is most unfortunate that some manufacturers who had experienced in foreign trade with China have lost all interest in the business and no longer consider foreign trade as worth while.

On the other hand some new forces that have come prominently into Southern merchandising of cotton goods are being felt, and they are favorable to a persistent development of foreign markets. There are men who still hold that tobacco, steel, and cotton products, made in America, can be merchandised along similar lines. No one hears complaints now of the lack of financing on the part of American banks to help American textile manufacturers, but in many places just complaint is made of the indifference of American manufacturers to their great opportunities.

The pressure of war has been very hard in England, yet today English textile manufacturers are making broader plans than ever before for the maintenance and expansion of their wonderful foreign business. Yet right in this country there are Englishmen familiar with American producing powers in textile lines who say that if proper mercantile and manufacturing co-operation is possible, this country's foreign textile trade will become as profitable and important as any other trade can be. The war has certainly made a rare opportunity in this respect.—Latin American Opportunities.

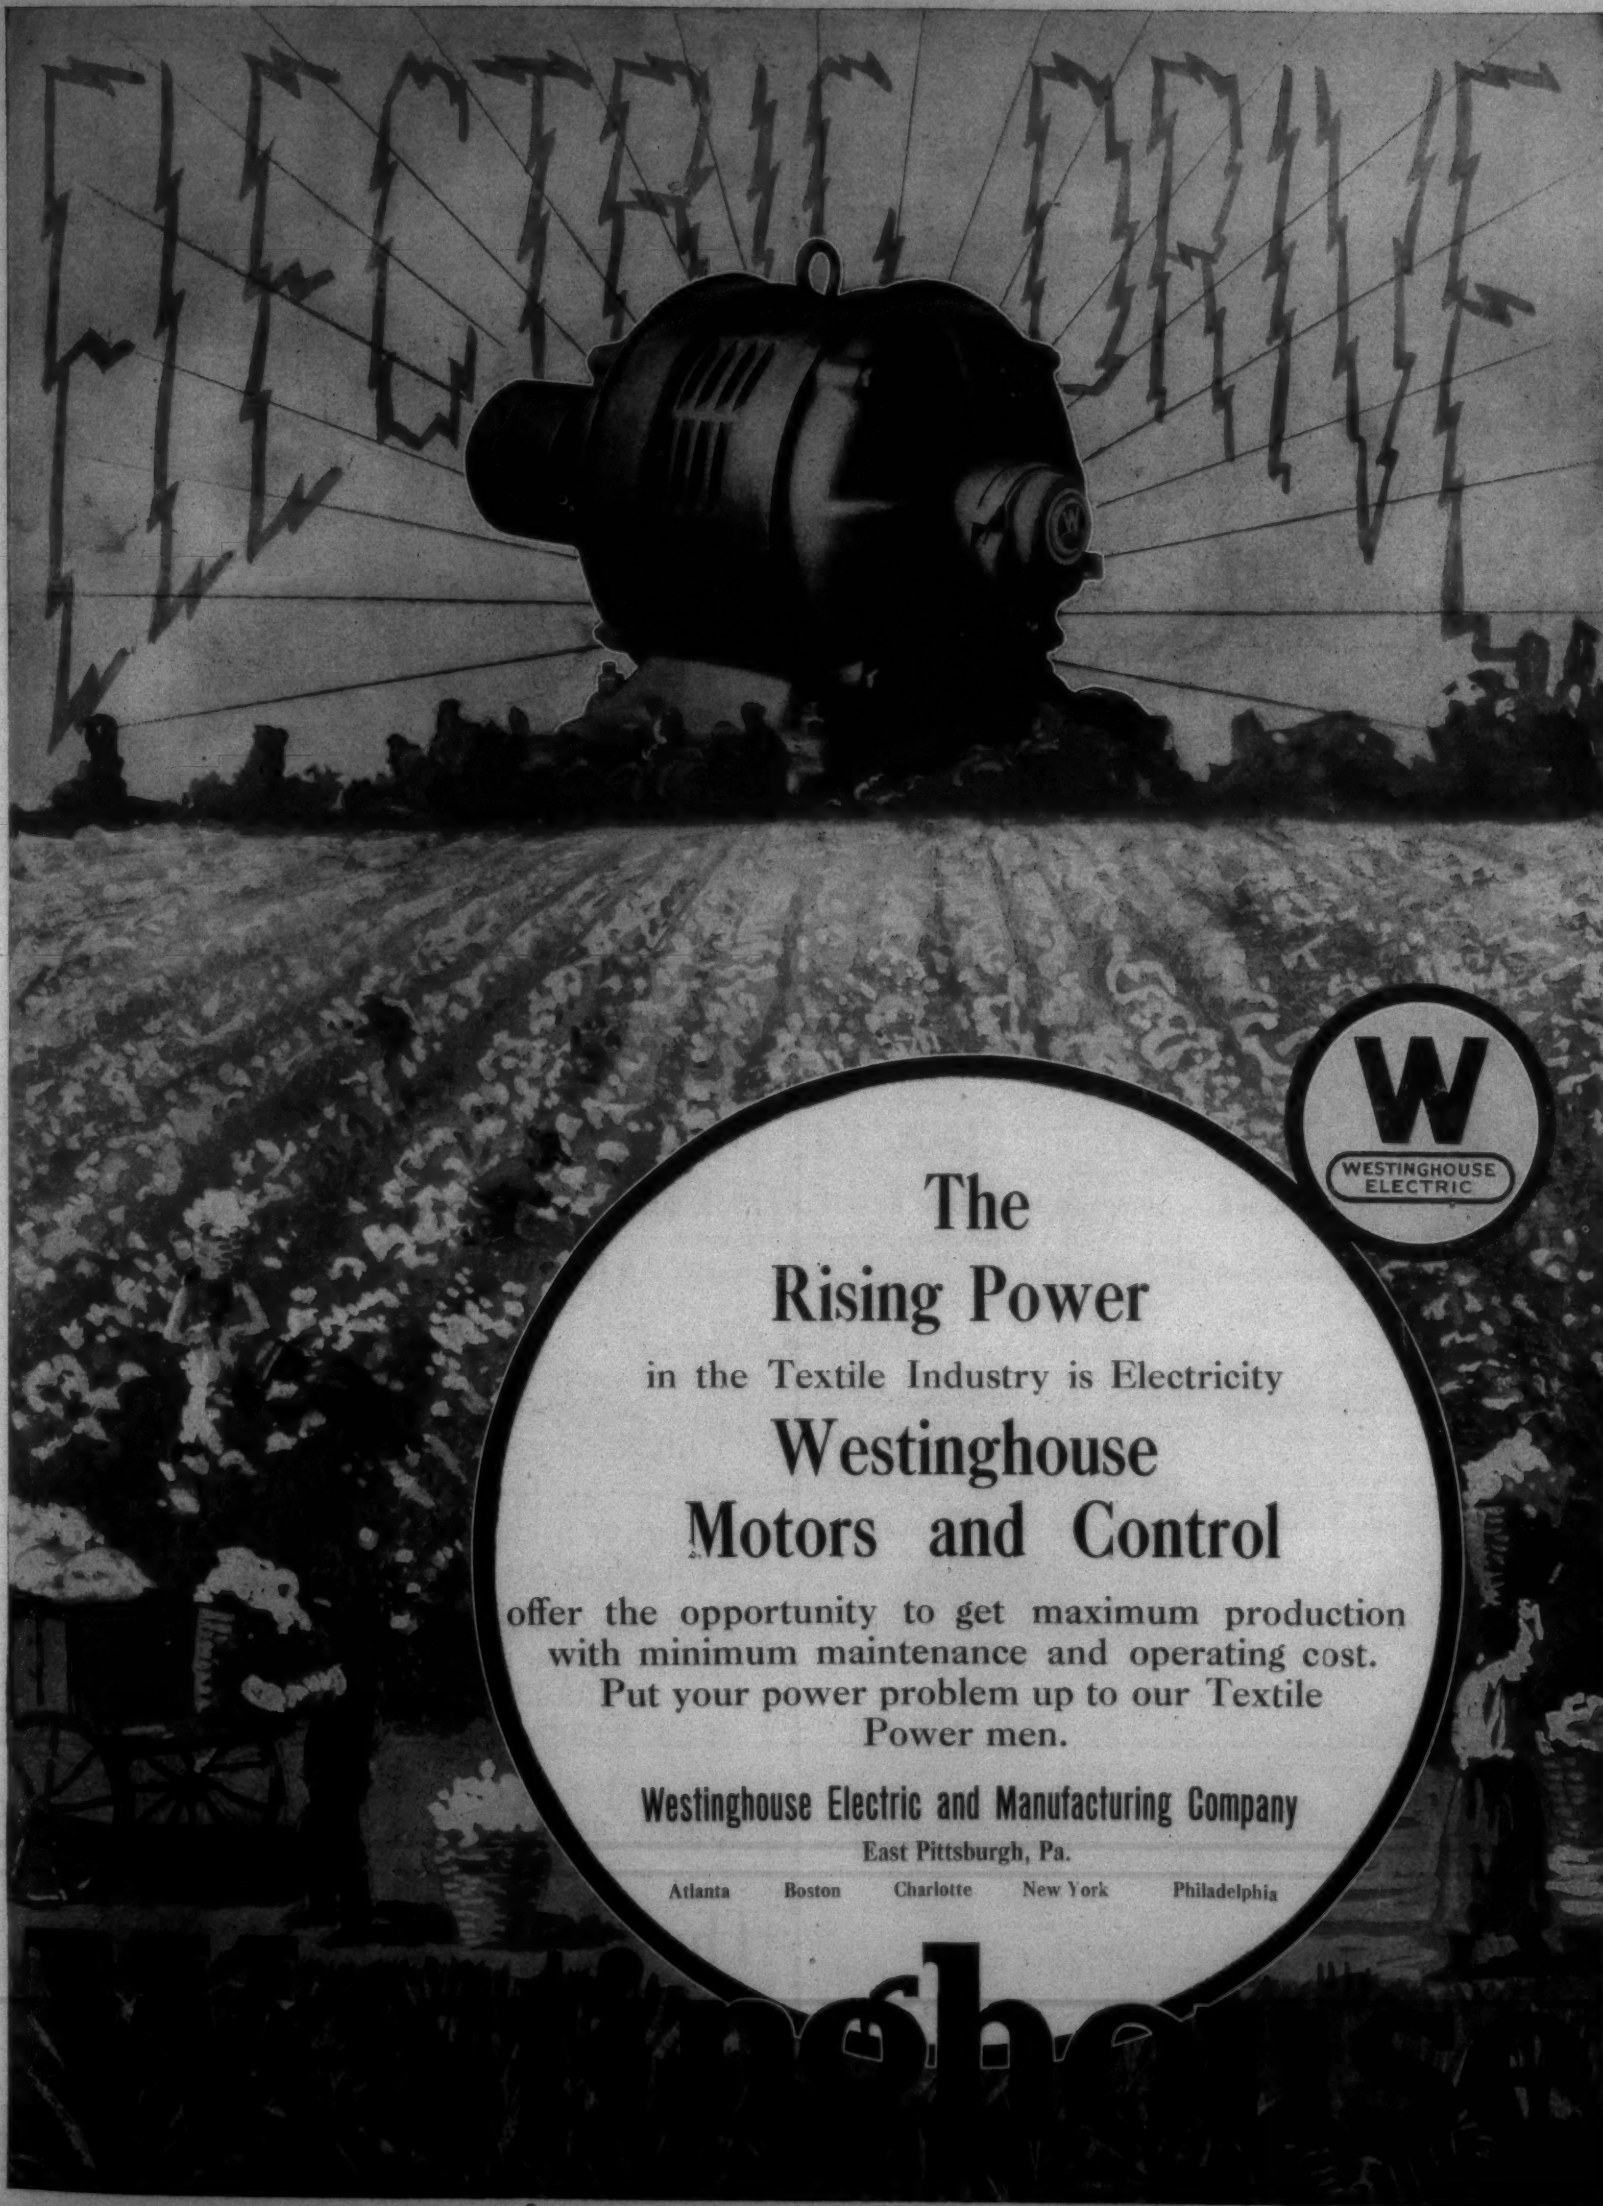

Mill Honor Roll.

Geo. W. Shipp, son of S. B. Shipp, superintendent of the Shaw Cotton Mills, Weldon, N. C., has recently been promoted to corporal in Troop G, Third Cavalry. Mr. Shipp was formerly overseer of spinning at Wilson, N. C.

Practical Loom Fixing by Thomas Nelson.

We have received from the bindery the first lot of "Practical Loom Fixing," by Thomas Nelson, and orders are already beginning to come in. The first mill to order a dozen copies was the Pelham Mfg. Co., Pelham, Ga., but a great many mills will undoubtedly order them for their loom fixer, for the information therein is sure to increase the efficiency of any loom fixer who studies same.

The price of "Practical Loom Fixing" is \$1.25 per copy, but we allow a discount of 10 per cent on lots of one dozen or more.

Advance Notices of Exhibits.

(Continued from page 6.)

tor will be in actual operation so that the visitor can see just exactly how the device works and how it succeeds in maintaining a constant pressure on the line which is so greatly to be desired.

There will also be shown a complete line of accessories used in the electrical installation of textile mills, including switches, control devices, lightning arresters, insulating material, lighting fixtures and measuring instruments.

The company will also exhibit a complete line of industrial and domestic heating devices, their use being demonstrated so that the visitor may obtain an idea of the advantages to be gained from the use of same.

For distribution among those interested in the industry will be an elaborate publication illustrating and describing Westinghouse equipment for textile mills. This publication, which is profusely illustrated with views of textile installations many of which are in the South, is just off the press and will have its initial distribution at the show.

A small pocket data book containing much valuable information with regard to the application of electrical apparatus to the textile industry will also be distributed to the visitors at the Westinghouse booth.

The Westinghouse Company will be represented by the following: Albert Milnow, industrial division, Charlotte office; C. L. Speake, industrial division, Charlotte office; John Gelzer, manager of industrial division at Atlanta; and J. S. Henderson, industrial department, East Pittsburgh.

The Westinghouse Lamp Company will also have an exhibit at the show in which the use of the Westinghouse Mazda lamp in textile work will be well illustrated.

Standard Fibre Co.

The exhibit of the Standard Fibre Co. will be as follows:

"No-Waste" Seamless Roving Cans: The body of these cans are entirely seamless without joints or rivets. They can be had with either smooth rolled fibre tops or electrically welded polished metal tops. The kicking band at the base of the can is also seamless without joints or rivets or clasps. The bottom and bottom ring are of heavy gauge, metal ring being electrically welded and made one piece and securely clinched. These cans are extremely durable and are claimed by the Standard Fibre Co. to be the smoothest and best constructed can on the market.

The round taper baskets are made for mill purposes in general and can be had in a variety of sizes and with wood or metal bottoms and the advantage in their use is they can be nested one into the other, thus saving a great deal of storage space when not in use. They are smooth, durable and well finished and are in large demand among the textile mill in general.

The fibre cars or trucks are now becoming an important part of mill equipment. These cars are made of heavy gauge materials, extra heavy

corners, clear quality hard Michigan maple mouldings, extra heavy malleable iron corner castings. All rivets are countersunk flush with the mouldings and the bottoms are guaranteed to be No. 1 long leaf North Carolina hard pine matched and heavily cross cleated and trucks are then mounted on our standard large face self-oiling casters.

J. W. Brock of Somerville, Mass., will be present.

Clipper Belt Lacer Co.

The Clipper Belt Lacer Co. will exhibit their belt lacers and supplies. Fred A. Stone, secretary and treasurer, will be in attendance.

Atherton Pin Grid Bar Co.

The Atherton Pin Grid Bar Co. of Providence, R. I., will exhibit a full line of their grid bars and split lap preventers. L. D. Armstrong, of Providence and A. G. Laughridge, Southern representative, will be present.

General Electric Co.

The exhibit of the General Electric Co. will be located in sections 264-267 inclusive on second floor of the new Exposition Building. These sections will be rather as a meeting place than to show apparatus of which there will be little on display.

The G. E. representatives who will attend are: Sidney B. Paine, manager of the mill power department, Boston; C. A. Chase, mill power department, Boston; J. B. Wiard, designing engineer, West Lynn Works; W. J. Dorworth, Baltimore office; E. P. Colés, Charlotte office; W. H. Wylie, Jr., Charlotte office; D. W. Peabody, district manager of the power and mining department, Atlanta office; H. S. Roberts, mill power department, Atlanta office.

Graton & Knight Mfg. Co.

The Graton & Knight Mfg. Co. will exhibit a complete line of textile beltings, strappings, bearings, etc., as encountered in the textile industry.

H. M. Bonney, their Atlanta branch manager, will be in charge of the exhibition, and will be assisted by many of the local salesmen.

Main Belting Company.

The Main Belting Company will show a loom operating with their Leviathan belt, which is made specially for loom work, and also a tight and loose pulley drive, equipped with a roller shaft which is so designed as to make the unravelling of the belt an impossibility.

Rupert E. Hall and F. R. House will be present.

The Bradley Stencil Machine Co. exhibit will consist of their several styles of machines for cutting paper stencils for the marking of shipments.

The exhibit will be in charge of S. J. Webb.

William Firth.

Wm. Firth of Boston will exhibit their dustless card stripping and cleaning system and also their broomless floor sweeper.

Milton G. Smith of Greenville will be present and have charge of the exhibit and one of their men from Boston will act as a demonstrator. They are now equipping the Cam-

(Continued on page 14.)

**The Psychrostat**

An Automatic Humidity Control Greatly Increases the Value of ANY Humidifying System.

The Psychrostat has proven itself reliable and efficient — good enough for the United States Government.

There can be no permanent "set" or variation from adjustment because none of its elements are subject to any strain.

May we explain its operation fully and tell you how it greatly increases the value of any humidifying system and why it is quite essential under certain conditions?

Write us for the facts, details and price.

The G. M. Parks Company

Fitchburg, Mass.

J. S. COTHRAN, Manager Southern Office, Charlotte, N. C.

Story of the Steel Hanger and a "Close Call"

"It happened last year in a cotton seed mill down in Texas. A 12-inch double-leather belt ran off the pulley one day and got caught. The strain would have broken any ordinary hanger; but we were using 'Pioneer' Steel Hangers, and to that foresight the engineer and I owe our lives. The 'Pioneer' stood the test and upheld its reputation for strength with 100 per cent. efficiency." We'll furnish the name and address of the man who wrote this letter if you wish.

"Pioneer" Hangers never break. They weigh only about a third as much as cast iron hangers and cost no more. One man can put them up alone. Can you think of any logical reason why you shouldn't buy them in preference to all others? Do it now—before the accident.

PATENTED

After seven years service in the plant of the Edison Storage Battery Company, this bearing was examined. They reported "no noticeable amount of wear, with no attention given but a semi-annual inspection and oiling."

"We Saved 9.2 H. P."

That's the Hyatt experience of the Whitman-Barne Manufacturing Company, of Chicago.

The Turner, Day & Woolworth Handle Company of Louisville, saved \$1,000 a year in power by using Hyatt Roller Bearings.

Some Large Users

FOR THE

"American" Steel Split Pulley

The Ford Motor Co.....	Uses over 25,000
The Cadillac Motor Co.....	Uses over 25,000
Western Electric Co., Chicago.....	Uses over 20,000
The Brown Shoe Co., St. Louis.....	Equipped throughout
Endicott-Johnson & Co., Endicott, N. Y.....	Equipped throughout
International Harvester Co.....	Equipped throughout

These concerns buy the "American" Steel Split Pulleys because they add to the efficiency of their efficiently run plants.

Let us tell you why.

AMERICAN Steel Split PULLEYS

T. R. Says:

"Nine-tenths of wisdom is being wise in time."
Therefore specify your requirements now in

ARROW LEATHER BELTING

Built Up to a Standard Not Down to a Price

Cotton States Belting and Supply Co.
ATLANTA, GA.

Advance Notices of Exhibits.

(Continued from page 12.)

perdown Mill in Greenville and have arranged to use that equipment as a sample for demonstration, which can be shown to mill men who are interested. Joseph J. Smith of Boston will also be with the exhibit.

Monroe Calculating Machine Co.

The Monroe Calculating Machine Co. will have booths No. 367 and No. 368, and we will have on exhibit there the Monroe Calculating-Adding Machine, a small desk machine occupying less than a square foot of space and operates by a simple direct method performing addition, subtraction, multiplication and division as easily as the ordinary adding machine adds.

Blauvelt-Wiley Paper Mfg. Co.

The Blauvelt-Wiley Paper Mfg. Co. will exhibit a full line of cone wrappers, case lining and baling papers.

The principal exhibit will be of printed cone wrappers, showing three color process of printing, the finest class of the printing art.

C. L. Blauvelt will be with the exhibit.

Frank Mossberg Co.

The Frank Mossberg Co. will exhibit at the coming textile show their complete line of steel warp beam heads, loom beam heads, adjustable beam heads, narrow fabric beams, Jack spools, spools and drop wires.

The feature of their exhibit will be their absolutely guaranteed indestructible steel warp beam head, which is so designed and constructed that it can be fitted to the wooden barrel, in the place of the cast-iron heads without necessitating any changes in the wooden barrel.

These heads are so much lighter than the cast-iron heads that when used for shipping purposes create a saving of 54 per cent of the freight bills.

A. A. Underwood will be in charge of the exhibit.

Morse Chain Company.

The Morse Chain Company, Ithaca, N. Y., will have an exhibit of 200 square feet at the head of the landing on the second floor. One of the features of the exhibit will be a 100 horsepower Morse silent chain in operation, driven by a one-half horsepower Morse silent chain. An ingenious arrangement on the shaft permits the entire movement of the Morse rocker joint in the big chain to be followed with the eye, thus explaining this exclusive construction. They will also have photographs of installations and interesting literature; together with a valuable souvenir for their friends.

The exhibit will be in charge of George W. Pritchett, Southeastern representative, who has charge of the Morse Chain Company's office in Greensboro, N. C., and who will be glad to meet his many friends. He will be assisted by John S. White, manager of the Morse Chain Company, Boston office. F. L. Morse, president of the Morse Chain Company, and V. D. Morse will visit the exposition.

Jenkins Bros.

Jenkins Bros. are manufacturers of an extensive line of valves, suit-

able for all kinds of steam power plants and factories.

They propose to exhibit samples of their leading lines of valves and also mechanical rubber goods, which include sheet packing, gaskets, gasket tubing, pump valves and valve discs. The exhibit will be in charge of their representative, B. R. Wofford.

Foster Machine Co.

The Foster Machine Co. will show the Foster model 30 cone winder, winding knitting yarn on cones for knitting purposes, also the Foster tube winder, winding yarn on parallel tubes for twisting and warping. The Foster tube doubling machine, doubling from two to four ends onto tubes for twisting supply, electrical wire covering and other purposes requiring two or more ends folded.

The exhibit will be in charge of T. E. Conner, and R. Q. Ford will also be in attendance.

R. D. Cole Mfg. Co.

The R. D. Cole Mfg. Co. will have on exhibit a model of their Manning vertical tubular boiler and photographs of their various products. Their exhibit will be in charge of N. B. Hudson, general sales manager.

Lombard Iron Works.

The Lombard Iron Works have space No. 274. They expect to have samples of textile supplies as well as samples of their castings, etc. One point which they will endeavor to bring to the attention of their friends who visit them will be their horizontal return tubular steam boilers, which are in many of the textile mills of the Piedmont section, also their double jacketed steam sizing kettles. The exhibit will be in charge of James Brotherton.

H. F. Livermore & Co.

The exhibit of H. F. Livermore at the Textile Exposition will consist of loom repair parts in general, laying special stress upon those pieces placed upon the market by them of recent and improved construction; also a general line of weave room specialties and supplies. All the items displayed will be most modern and up-to-date in every respect.

Their booth will be in charge of William P. Vaughan, their representative in the district.

David Lupton's Sons Co.

David Lupton's Sons Co. will occupy spaces 500 and 501 at the Southern Textile Exposition, Greenville. They will show various types of Lupton steel sash, skylights, sash operating devices, together with Pond continuous sash, weathertight sash construction for monitor and sawtooth roofs, all with special reference to textile mill construction.

The exposition will be in charge of Mr. Luke Seawell, Charlotte, N. C., their representative in North and South Carolina, and C. F. P. Buckwalter, assistant sales manager.

A. W. Harris Oil Co.

The exhibit of the A. W. Harris Oil Co., Providence, R. I., will be at space No. 543, balcony, where they will have for distribution printed matter, and will show samples of their oils and greases, and William M. Kendrick will be in charge and present to greet all callers.

SACO-LOWELLSHOPS

TEXTILE SERVICE

FOR the convenience of our customers, we maintain in connection with our Charlotte office, a completely equipped shop, for the proper reclothing of Card Flats and Card Lickerins. Skilled experts are in charge and we invite you to avail yourselves of this service. A stock of card clothing constantly on hand enables us to supply all requirements promptly.

We are especially anxious that all our cards either Newton or Lowell pattern give satisfactory service and upon request will send expert to inspect cards and make such recommendations as may be necessary to put them in the very best possible shape.

Henry Foster has accepted the position of night spinner at Hartsell Mills, Concord, N. C.

R. L. Robbins has been promoted from second hand to carder for the Fairmont Mfg. Co., Fairmont, S. C.

Edward Foster has taken a position as machine fixer at the Defiance Sock Mill in Charlotte.

R. L. Junkin has been promoted from loom fixer and machinist at the Brogon Mills, Anderson, S. C.

James Talbert has changed from overseer of spinning, Gibson Mill, Concord, N. C., to overseer No. 4 spinning, Schoolfield, Va.

James Talbert has resigned as spinner at Gibson Mill and accepted similar position at Schoolfield Mill, Danville, Va.

J. F. Whorton has resigned as overseer spinning at the Imperial Cotton Mills, Eatonton, Ga., to accept a similar position with the Mary-Leila Cotton Mills, Greensboro, Ga.

H. M. Walton has resigned as superintendent of Buffalo Mill, Concord, N. C., and is now night superintendent of Alpine Mills, Morganton, N. C.

W. R. Smith, from Palmetto Mills, Columbia, S. C., has changed to second hand in cloth room, Columbus (Ga.) Mfg. Co.

J. B. Willis has accepted position as master mechanic at the Fountain Inn Mfg. Co., Fountain Inn, S. C.

T. A. Putnam has resigned as superintendent of the Mills Mfg. Co., Greenville, S. C., on account of ill health and removed to his farm.

—, Hitt, formerly loom fixer at the Issaqueena Mill, Central, S. C., has accepted a similar position with the Easley Mill No. 2, Liberty, S. C.

W. B. Biggers, formerly overseer of weaving at Gastonia Mfg. Co., is overseer of weaving at Ranlo Mfg. Co., Gastonia, N. C.

F. L. Wilson has changed from superintendent of Avon Mills to same position at Gastonia Mfg. Co., Gastonia, N. C.

W. D. Dale of Gaston Iron Works has accepted position of master mechanic at Ranlo Mfg. Co., Gastonia, N. C.

N. B. Davis has been promoted from overseer of spinning at Clara Mfg. Co. to superintendent of Armstrong Mills, Gastonia, N. C.

Henry Parnell of Jackson, Ga., has taken a position in the weave room at the Brogon Mills, Anderson, S. C.

J. P. Hill, from Columbus, Ga., is overseer of carding and spinning at the Cleghorn Mills, Rutherfordton, N. C.

B. M. Everett has returned to his former position as overseer of spinning at night at the Anchor Duck Mills, Rome, Ga.

W. E. Russell, of Petersburg, Va., has accepted the position of night superintendent at Norwood Mfg. Co., Norwood, N. C.

A. L. Ledbetter, of Wiscasset Mill No. 6, Albemarle, N. C., has accepted the position of section hand in spinning at Norwood Mfg. Co., Norwood, N. C.

E. W. Spradley, from overseer spinning, Dixie Mill, Mooresville, changes to same position with the Highland Cotton Mill, High Point, N. C.

On all bearings of Cards, Looms, Eveners, Cotton Bale Openers, Cotton Feeders, Breaker Lappers, Drawing, Slubbing, Roving, Jack and Ring Spinning Frames, Wet and Dry Twisters, Cone Winders, Threading Extractors, and other Textile Mill machinery Albany Grease should be used at all times for efficient and economical lubrication service. An Albany Cup and samples of Albany Grease will be sent free of charge for trial.

ALBANY LUBRICATING COMPANY

708-10 Washington St.

NEW YORK CITY

L. A. Patterson, formerly master mechanic at the Brogon Mills, Anderson, S. C., to become chief engineer at the Highland Park Mfg. Co., Rock Hill, S. C.

J. A. Fenley, formerly master mechanic at the Fountain Inn (S. C.) Mfg. Company, has accepted a similar position with the Jackson Mills, Iva, S. C.

H. E. Paly has been made Y. M. C. A. secretary for the Ware Shoals (S. N. C.) Mfg. Co., succeeding E. S. Mowbry, who enters the Army.

Frank Hartsell has resigned as section hand in spinning at Franklin Mill, Concord, N. C., and accepted similar position at the Buffalo Mill.

G. W. Dearman, from Dixie Spindle & Flyer Co., of Charlotte, has changed to second hand in spinning, Highland Cotton Mill, High Point, N. C.

HAVE YOU A MILL TO LOCATE?

United States Census figures show that since 1880 the consumption of cotton in mills of the cotton growing states has increased 1,502 per cent, as compared with an increase of only 93 per cent in all other states.

In the twelve months ended July 31, 1917 Southern mill consumed over 1,000,000 more bales of cotton than the mills of all other states.

The census figures also show that in these twelve months the consumption of mills in the South increased 373,885 bales, or nearly 11 per cent, over the preceding 12 months, as compared with an increase of 29,600 bales, or only 1 per cent, in all other states.

Three-fourths, or 9,000,000, of the total cotton spindles in all the cotton growing states are tributary to Southern Railway System tracks. Of the 200 knitting mills in the South over 125 are located along the Southern Railway System. Most of the Southern woolen and silk mills are on Southern Railway System tracks.

There is a reason for this, and it is not difficult to understand.

The Southern Railway System Lines enter and serve most completely these portions of the South where the textile industry is the greatest success, because there are found all the conditions which makes for successful manufacture—the proper transportation facilities, the ease with which the raw material and the needed fuel may be secured, the supply of good labor, the pure water, the low cost of power, and favorable local conditions.

Not only for textile plants but for all other industries the best advantages will be found in this territory.

If you have a plant to locate, let us take up with you the question of the proper location. Your plans will be held confidential. Our knowledge of conditions at various points and our experience in locating other mills and the time of our agents in making special investigations are at your service, if desired.

We always have special locations or propositions worthy of your attention.

M. V. RICHARDS, Commissioner
Southern Railway System
Room 129, Washington, D. C.

MILL NEWS ITEMS OF INTEREST

Birmingham, Ala.—J. G. Hanlin is said to be interested in plans for establishing a hosiery knitting mill.

Columbia, S. C.—The Pacific Mill authorities gave a barbecue at the Y. M. C. A. to their help last week.

Columbus, Ga.—The Swift Manufacturing Company is about to build another warehouse for its plant. This is to cost \$6,000 and will be 50x100 feet, of fireproof construction.

Chattanooga, Tenn.—The Park Woolen Mill's warehouse was destroyed by fire, the loss being estimated at \$18,000 to \$20,000, according to local report. The building and contents were insured for \$15,000.

Gastonia, N. C.—The Ranlo Mfg. Co. are erecting the machinery. They will be equipped with the very latest machinery for making automobile tire goods. They expect to start about January 1, 1918.

Gastonia, N. C.—The Rex Spinning Co. have built a new addition to their mill, 130x150 feet, and put in the following new machinery: 22 cards, 12 combers, 10 speeders, 16 twistors; also built 9 new 5-room houses.

Concord, N. C.—The Brown Manufacturing Co., manufacturer of domestics, ginghams and two-ply yarns, has erected an 80x50 foot building which will be used as a long chain dyeing and slashing room. It has also erected a drug room, 16x25 feet.

Mobile, Ala.—Barker Cotton Mills, J. A. Rountree, manager, will invest \$88,000 for new machinery, to be added in order to increase the company's production of cotton yarn, and contracts have been about closed for this equipment. The increase is found necessary because of Government demands for the Barker production of yarns.

Middleton, Ga.—At the recent administrator's sale of Beverly Cotton Mill, M. B. Pitts, who has been operating same for fifteen months, under lease, purchased the plant. The mill contains 7,500 spindles, 62 duck looms, and has a complete dye plant for dyeing raw stock cotton. The mill is all on Government goods, making fiber dyed duck for leggings, and the present owner is making improvements, both to the mill and village. He has already bought some new machinery, and will install 5,000 more new spindles with other preparatory machinery, and will erect at once 20 new tenant houses, and other improvements in the village.

Cedartown, Ga.—The Noble McNamara Co., it is understood, is to be formed to take over the Noble-Beveridge Co., dyers and finishers of cotton piece goods up to 72 inches

wide. The officers of the company will be unchanged, and are at present, F. D. Noble, president and treasurer; H. C. McNamara, secretary, and P. J. McNamara, vice-president and general manager. The capacity of the plant is 75,000 yards daily and the company makes a specialty of khaki and olive drabs which meet Government requirements, its goods also being water and mildew-proofed.

Forest City, N. C.—A community fair was held at Covington House on Thursday of last week at which operatives of the Florence Mills exhibited flowers, garden products, fancy work, etc. It was an all-day affair and the public was invited. The stockholders' meeting came off that day and all the mill girls wore aprons and caps made of the blue chevrot which was made by the local mill; material was given them by Superintendent Covington. The mill grounds were cleaned off and all the interiors of the mill and outside buildings were painted in red, white and blue and everything looked like a gala occasion.

Columbus, Ga.—At a special meeting of the stockholders of the Muscogee Manufacturing Co., manufacturers of shirtings, towels, and yarns it was proposed to ask the courts for an amendment to the charter, increasing the capital stock from \$360,000 to a sum not to exceed \$1,000,000.

President E. W. Swift, of the company, said the increase is to cover the recent extensions to the plant, which cost \$500,000. No additional improvements will be made in the immediate future, according to Mr. Swift.

It is said the amendment to the charter will include a change in the by-laws, providing that the corporation may have in addition to a president, secretary and treasurer, a vice-president and such other officers as may be needed.

Cumberland, N. C.—An addition has been erected to their former

mill building by the Necronsett Mills, Inc., consisting of a concrete structure 100x55 feet, with other alterations which have given them an additional 18,000 or 20,000 square feet floor space. This addition will double their present capacity, including 5,000 more spindles on combed yarns. These spindles have been furnished by the H. & B. American Machine Co., Ltd., and Whittin combers have been ordered. Other complementary machinery will also be installed in order to maintain this equipment, and all of the new machinery will be of the most modern type, with the latest improvements designed to increase the quality as well as the production of high grade combed yarns. At a recent election the following officers of the company were appointed: President, J. Frederic Houston; vice-president, Andrew S. Webb, Charles J. Webb & Co., Philadelphia; treasurer, Rushon Marot, president of C. H. Howell & Co., Inc., Philadelphia; general manager, Clifton Corley, who has already served in that capacity for a number of years past. The new addition to the mill it is expected will be partially under operation by March, 1918, with the balance completed and running in July of the same year.

Cherryville, N. C.—A cotton mill deal of considerable interest, to Cherryville and Gaston county has just been closed here. John J. ane,

George, H. D. George and T. C. Summer have purchased the interest of D. P. Rhodes and got control of the Vivian Cotton Mills, acquiring practically all the outstanding stock of the mill. The new owners have already taken charge. A new set of officers was elected at a meeting, as follows: John J. George, president; H. D. George, vice president, and T. C. Summer secretary and treasurer.

The mill under the management of Mr. Rhodes has made a fine showing, accumulating a larger surplus than at any time in the history of the mill for the length of time.

Mr. Rhodes will remain with the mill for two or three weeks until the new management becomes somewhat familiar with the situation, and then it is understood that he will go into a much larger mill, either here or nearby.

Mebane, N. C.—A number of parties in Mebane are interested in locating a cotton mill. Those interested in promoting such company include a banker, several prominent manufacturers and other leading business men of Mebane, while a superintendent of long experience desires to take stock in the company. The town is prepared to offer special inducements in order to secure such an industry and parties interested in the matter are F. F. Smith, cashier of the Bank of Mebane.

Employees are More Contented Where Grounds are Attractive.

If the grounds about this mill-village are planted with trees, shrubs, etc., your employees will take added interest in their work and be more contented.

Mr. J. H. Mayes, President of the Rex Spinning Co., Charlotte, N. C., says: "The directors of this mill feel that it is a decided benefit to owners to make the grounds attractive and give the employees pleasant homes."

Let Lindley Help You

Our landscape department has planned attractive grounds for many mills, and is ready to help you when you say the word. Will you say it.

Landscape Department
Oak Ave. Pomona, N. C.

Going Over the Top.

No soldier would think of going "over the top" "over there" unless he was confident that his equipment was in first class order. Over here no manufacturer should consider an attack for bigger business unless he had every detail in his establishment at the greatest pitch of efficiency. The textile men who do carry on with maximum success are invariably those who make use of the splendid line of supplies made especially for them by The Arabol Mfg. Co., 100 William St., New York City, whose advertisement appears elsewhere. To "carry on" with the aid of Arabol means certain success. Arabol Mfg. Co.

Maiden, N. C.—The Maiden Mills No. 2 are, putting in the following new machinery: 8 new Saco Lowell cards, 2 draw frames, 3 fly frames, 2 Kitson pickers, 1 Foster winder.

Huntsville, Ala.—The new Abingdon village, which has been created to provide homes for operatives brought here as a result of recent additions to the Abingdon Cotton Mills, is nearing completion. Fifty houses have already been finished and the new \$10,000 schoolhouse will be ready for opening January 1. The new village is a modern mill town in every respect.

Gastonia, N. C.—A. B. Cook states that he has ordered equipment for a second hosiery mill, but has not fully decided as to its location.

Cotton Goods

New York: The cotton goods market was fairly active during the past week. A big business in print cloths for February and March deliveries was reported. A number of sales further into the year, at "fancy" prices were recorded, but in general the mills were not willing to contract too far ahead. Converters seem to be satisfied that the future will require fair size quantities in gray. The result is that some worth while business is passing.

Sheetings are receiving continued attention, especially from the bag houses, which are feeling the shortage of burlaps.

Active buying in heavy goods was reported, contracts running into July, August, and even into September.

The needs of the government remove from the market so much materials needed for civilian consumption that it leads to more or less of a rush for what is left.

Judging from business being done on government account there appears to be no fixed standard for duck used by the government in the manufacture of tints. Twelve-ounce duck seems to have the preference, but it is also understood that other is being taken for this purpose, certain mills are producing, for their own convenience, a double width of similar weight and which is being accepted without question.

This activity of domestic business was so good that many mills are said to be displaying little interest in export trade. This lack of interest is being looked on as a grave mistake by experienced domestic and export business heads, who feel that the United States should make herself solid with the world at large and lay foundation for an export that will surpass that of any other nation.

There were more inquiries than usual from Greece and the Mediterranean points accompanied by an urgent call for early shipment. The request was chiefly for staples, elastic as to quantities, and letting the agent supply known deficiencies so far as he could. A good many goods were forwarded to the Philippines and general satisfaction is expressed over the clearing away of an embarrassing load of delayed business. The embargo on Scandinavian countries has brought business from that quarter to a full stop.

It is likewise reported that Manila is in the market for sheetings.

Conditions concerning South America, Mexico and Island shipments of cotton goods are less perplexing than European and Asiatic shipments, but orders from these quarters are not so numerous nor so large as it is argued they should be. Buyers of supplies in South American markets felt keenly the last few advances made in raw cotton and despite the fact that the cotton market has been fairly stationary the last few weeks former trading has not been fully renewed. Ginghams are being demanded by

all foreign countries where it is possible for goods to be sent.

There was a demand from China for various grades of sheetings. Some of the small lots of American cotton fabrics sent to China some months ago are reported to be offered for resale to United States buyers.

The Yarn Market

Philadelphia.—The cotton yarn market was still featured during the past week by purchases for government work. There was a good demand for yarn in spots, and sales of 25,000 pounds and upward were made for future deliveries. Most manufacturers and dealers seem to be of the opinion that yarn will not be any cheaper. In spite of this fact, however, there is very little buying in excess of actual needs as they (the manufacturers) do not consider yarns a safe investment at present prices.

The delays in transportation are continuing to cause a great deal of trouble as dealers find it difficult to make deliveries of yarn to manufacturers on account of this delay. This naturally causes a great deal of misunderstanding as it is hard to convince customers that they are not diverting the yarn to some one else, who has paid a premium to get spot delivery. Many blame the railroad managers for these transportation difficulties.

The demand for combed yarns during the week was light. Prices were too high for the average manufacturers. A good many manufacturers, however, are well covered until the first of the year and later. That means the spinners are equally as well sold up. The demand during the week was chiefly for splicing yarns, and the quotations taken were not large.

There was a demand in spots for carded yarn on cones for future deliveries with prices tending upward.

Prices continue to go up after every safe in the weaving yarn market. Government contracts were the cause of this market advancing.

MONOPOLE OIL

U. S. Patent No. 861,397

Serial No. 367,303

A valuable and well known product.

In Dyeing cotton it gives penetration and evenness of color, together with brilliancy.

In Finishing it imparts the much appreciated "glovey" feel.

Invitations have been issued to the marriage of Clifton Corley, manager of the Necronsett Mills, Cumberland, N. C., to Miss Bessie Smith of College Park, Ga. The marriage will take place on November 28th.

J. H. Meekins, who has had charge of both carding and spinning at Victory Mills, Fayetteville, N. C., will hereafter devote all of his time to the carding department.

Stuart W. Cramer was in Washington recently attending meetings of the excess profits advisers appointed by Secretary McAdoo to help in the collection of the excess profits taxes. Mr. Cramer is one of nine business men of the country chosen for this work.

Laments Watson's Death.

Governor Manning of South Carolina, has made the following statement:

"I have just heard of the death of Commissioner E. J. Watson. The news of his end will cause deep sorrow to his friends throughout South Carolina, and they were thousands. He was one of the best known men in the state. He was a tireless and indefatigable worker and seized every opportunity, both within and without the state, to present South Carolina's opportunities, and her advantages.

"He had, to a rare degree, the newspaper instinct for publicity, and he developed it fully in South Carolina's interest. He spared neither means nor his own strength to carry his message. The vacancy thus created will be difficult to fill. His death brings me great personal sorrow."

ARABOL SOLUBLE SOFTENING OIL

Reg. U. S. Pat. Off.

Reg. U. S. Pat. Off.

SUPERIOR TO TALLOW and cheaper. Used with starch on all classes of warps. Neutral. Especially valuable on warps, which, while requiring light sizing, must be very strong and smooth. It is strictly uniform and has none of the drawbacks of tallow. Can be used with any kind of starch or sizing material. Is especially valuable when used with a Soluble Gum, such as our Gum G, Yorkshire Gum, Scotch Gum, and the like, all of which attract moisture and lay the fibre, thereby prevent shedding. Arabol Softening Oil penetrates the yarn, and lubricates the fibre. Never gets rancid as tallow does and always keeps the slasher cylinders smooth and bright. The yarn never sticks when this Oil is used. Trial barrel sent on approval.

OIL LUBRICATES—TALLOW DOES NOT

ARABOL MANUFACTURING COMPANY

100 William Street, New York

CAMERON MacRAE Southern Sales Agent CHARLOTTE, N. C.

ENTWISTLE LEESE CLOCK

LEESES FROM 100 TO 1,600 YARDS

WITHOUT SET-BACKS OR MISTAKES

Each of the 10 grooves of the scroll represents a leese. The arrangement of the gearing is simple, the cut and leese gears are interchangeable.

Measuring Roll has Ball-Bearings, thus eliminating strain on yarn and assuring accuracy.

An Indicating Clock can be used with Leese Clock if desired and acts as a check on same, besides showing operator when end of leese is near as well as the total yardage.

Our catalogue, which will be furnished on request, gives a full description of Leese and Indicating Clocks.

A huge gas bag on top of an English bus serves in place of the gasoline tank. This bag is filled with illuminating gas and regular trips are made in spite of the absence of gasoline. The bag holds 600 cubic feet of gas. It is filled in twelve and a half minutes at a cost of thirty-six cents.

SOLUBLE TALLOW

A pure tallow scientifically rendered soluble. A superior product to natural tallow. It will flow at ordinary temperatures, is antiseptically treated, and will not decompose or turn rancid. Will not impart a "sour" or disagreeable odor to the fabric, as will naturally beef tallow.

SIGGERS & SIGGERS

Patent Lawyers

Suite 34 N. U. Washington, D. C.

Governor Whitman of New York was challenged by a sentry in camp on a dark night and explained that he was governor. The sentry replied: "I'm governor, too. Put up your hands!" A corporal explained the situation. The governor said to the sentry: "You are a good soldier," and passed on.

Employment Bureau

The fee for joining our employment bureau for three months is \$2.00 which will also cover the cost of carrying a small advertisement for one month.

If the applicant is a subscriber to the Southern Textile Bulletin and his subscription is paid up to the date of his joining the employment bureau the above fee is only \$1.00.

During the three months' membership we send the applicant notices of all vacancies in the position which he desires.

We do not guarantee to place every man who joins our employment bureau, but we do give them the best service of any employment bureau connected with the Southern textile industry.

WANT position as superintendent. Have had long practical experience as carder and spinner in first class mills and can furnish high class references. Address No. 2008.

WANT position as overseer of carding. Am experienced on carding and combing and am now employed in one of the most successful mills in the South as overseer of carding but prefer to change. Can furnish high class references. Address No. 2009.

"THE PROBLEM OF LOCATION" "YOUR PROBLEM."

In selecting a location for your plant you should keep in mind that proximity to raw material, proximity to markets, transportation facilities, low cost of power, abundance of labor, efficiency of labor and economical living conditions for that labor are the sine qua non of success.

The Seaboard Air Line Railway Company will place at your disposal, without cost, a man who will personally help solve your problem and call to your attention the most advantageous locations.

SEABOARD AIR LINE RAILWAY

"The Progressive Railway of the South"
Norfolk, Virginia

Norfolk, Va.

PROPER LOCATIONS FOR MILLS

United States Census figures show that since 1880 the consumption of cotton in mills of the cotton growing States has increased 1,502 per cent, as compared with an increase of only 93 per cent in all other states. In the twelve months ended August 31, 1916 Southern mills consumed 675,731 more bales of cotton than the mills of all other States. Three-fourths, or 9,000,000, of the total cotton spindles in all the cotton growing States are tributary to Southern Railway tracks. Of the 200 knitting mills in the South over 125 are located along the Southern Railway. All the Southern woolen and silk mills are also on Southern Railway tracks.

There is a reason for this, and it is not difficult to understand. The Southern Railway Lines enter and serve most completely these portions of the South where the textile industry is the greatest success, because there are found all the conditions which makes for successful manufacture—the proper transportation facilities, the ease with which the raw material and the needed fuel may be secured, the supply of good labor, the pure water, the low cost of power, and favorable local conditions.

Not only for textile plants but for all other industries the best advantages will be found in this territory. If you have a plant to locate, let us take up with you the question of the proper location. Your plans will be held confidential. Our knowledge of conditions at various points and our experience in locating other mills and the time of our agents in making special investigations are at your service if desired.

M. V. RICHARDS, Commissioner,
Southern Railway System, Room 129, Washington, D. C.

"IDEAL" AUTOMATIC LOOMS

Unsurpassed in Simplicity, Durability and other Desirable Qualities. No special mill supplies required. They make less waste than any other loom.
